# JTBREEZE™

## ULTRA-STRONG MEETS ULTRA-LIGHT

Just as strong as a conventional shower tray,  
but up to 80% lighter.

The new state-of-the art JT BREEZE™ is designed to be one of the lightest shower trays in the UK. It's set to cut installation time and costs and even comes with a 25-year guarantee.

Designed to complement the existing JT range, the new JT BREEZE™ is up to 80% lighter than a standard stone resin tray. And in tests, it's just as strong.

Easier to transport. Easier to install. Making the job easier. With no more two-man lifts on-site. Freeing up time and saving costs. The total installation solution weighs as little as 9kg for a 760mm x 760mm tray to 14kg for the 1200mm x 800mm tray, fully inclusive of all fixtures, fittings and packaging (leg set, panels, waste and flexi hose).
